

Faster Throughput - Reduced Wait Time
Creates comfort, convenience, and quality of care

Emergency Room Treatment Chair

Optimizes the ER, reduces operating costs, and promotes faster throughput.

- Enhances patient flow from door to discharge
- Eliminate patient lifting and transfers
- Minimize equipment and operating costs
- Help reduce patient and staff injury

Multi-Positional Features:

One touch Trendeleburg motion
Infinite positioning, variable height

Multi-Positional Benefits:

Patient comfort leads to higher HCAHP
Ergonomic position for nurses leads to less injuries

Multi-Functional Features:

Ideal for Triage, Exams, EKGs, Sutures, Hydrations, etc.

Multi-Functional Benefits:

No need for special procedural equipment means less capital purchases

Overall Features:

High weight capacity
Examine-Treat-Transport on one surface

Overall Benefits:

No need for special bariatric equipment means lower capital costs and less storage space required
Never transferring the patient means a safer workplace for nurses and less chance of falling for patients
